## **15 Top HPLC Questions and Answers pdf**

HPLC? In GC: use high percent loading of stationary phases and work at lower temperatures In HPLC: use smaller flow rates and use mobile phases of different polarity than mobile phase MULTIPLE CHOICE Choose the BEST answer for the following questions. 1. Of the following compounds, which would you expect to elute first from a nonpolar gas

## **Practice Problem Set 10**

Question 1. What Are The Main Differences Between High Performance Liquid Chromatography And Gas Chromatography? Answer : In HPLC the mobile phase is a liquid whereas in Gas Chromatography the mobile phase or carrier is a gas. HPLC is useful for analysis of samples which are liable to decompose at higher temperatures.

Answer / manigandan p. This both are separation technique. GC Principle: Sample vapourised by injection in to a heated system, eluted through column by inert gaseous mobile phase and detect. HPLC Principle: The solvent liquid will pressurize the sample through column. Column filled with adsorbent material.

### **What is the principle of GC/HPLC - Interview Questions and ...**

In HPLC pump system there is a piston which moves back and forward in the pump head which drawing in and pushing out the mobile phase with each movement. Since it is a moving part, a seal around this piston is required to prevent mobile phase leaking out of the back of the pump, over a period of time small amounts of mobile phase solvents leach through the seal to the back of the piston.
