### Indigenous / Traditional African Leafy Vegetables

To indigenous people, food is not only a product but a process. We must work to ensure that the world benefits from Indigenous knowledge, wisdom, and values. Food as a process underpins the concept of “food systems”, which involves an acknowledgement of the networks of land, labour and livelihoods that underpin diets, health and development.

### Indigenous knowledge and global food systems

The indigenous knowledge associated with African vegetables and their importance for the food security of many rural South Africans warrants further discussion. This is especially in light of food security activities emphasising food production and improved access to food in a country and region which is faced with two primary problems: water scarcity and the HIV/AIDS pandemic.
