Astigmatism Diagnosis & Treatment - WebMD

It is easy to correct regular astigmatism with regular glasses, contact lenses or laser eye treatment. However, it is difficult to correct irregular astigmatism. To correct this condition, some other type of lens is used, called rigid gas permeable lens. Because of being hard, it has to be used only when the person is awake.

Causes Of Irregular Astigmatism: How Can It Be Corrected?

In this case, the irregular astigmatism is a minor component and the unsatisfactory vision is mostly due to the cataract. The best treatment path would be to remove the cataract, place the implant, and take the patient's vision to where it was 10 years ago. • Cataract and anterior basement membrane dystrophy.

A Rational Approach to Irregular Astigmatism

A thorough review of treatment for non-inflammatory irregular astigmatism is beyond the scope of this article, but options include the use of rigid lenses (corneal gas permeables, sclerals and hybrids), as well as procedures such as corneal collagen crosslinking, conductive keratoplasty, intracorneal ring implants and corneal transplants.

Pathologic Causes of Irregular Astigmatism

Astigmatism Diagnosis and Treatment: What Causes Astigmatism? The most common cause of astigmatism is the eye itself. The cornea (the clear outer layer of the eye) becomes cloudy due to a combination of factors such as age, smoking, alcohol consumption, stress and other medical conditions.

Astigmatism Diagnosis and Treatment

Irregular astigmatism should also be suspected if a patient has a history of corneal surgery or trauma. Keratometric mires are often distorted. Corneal topography is more useful in making the diagnosis of irregular astigmatism, as a keratometer measures only a small area of the central cornea, so off-axis corneal irregularities can be missed.

Contact Lens Spectrum - Irregular Astigmatism, Part 1

The symptoms of astigmatism can vary from person to person. ... Astigmatism Treatment. Glasses or contacts may correct almost all cases of astigmatism. ... Irregular astigmatism is far less common and is associated with problems with your cornea, the front part of the eye.
