Sexology is the scientific study of human sexuality, including human sexual interests, behaviors, and functions. The term sexology does not generally refer to the non-scientific study of sexuality, such as political science or social criticism. Sexologists apply tools from several academic fields, such as biology, medicine, psychology, epidemiology, sociology, and criminology. Topics of study include sexual development, sexual orientation, gender identity, sexual relationships ...

A sexual field is an arena of social life wherein individuals seek intimate partners and vie for sexual status. Sexual fields emerge "when a subset of actors with potential romantic or sexual interest orient themselves toward one another according to a logic of desirability imminent to their collective relations and this logic produces, to greater and lesser degrees, a system of stratification" (Green 2014:27).

My research of gay sexual subcultures in New York City and downtown Toronto has prompted me to think of erotic worlds as physical sites of sexual sociality that are organized by an underlying structure of social relations—a sexual field. A sexual field emerges when actors with potential romantic or sexual attraction for one another converge in social space (e.g., a site) and wherein this convergence orients each toward the other according to a logic of desirability imminent to the domain ...
