Public acknowledgment of people with disabilities and progress toward universal design has developed in the last few decades along three parallel tracks of activities: legislation fueled by the disability rights movement, the barrier-free design to universal design movement, and advances in rehabilitation engineering and assistive technology.

## **The Center for Universal Design - Universal Design History**

Abstract. Purpose: To discuss Universal Design (UD) as an interdisciplinary topic with relevance for rehabilitation professions and planning and building professions. Significant for this topic is to discuss to what model of disability UD strategies correlates. The paper argues that the UN Convention on the Rights for Persons with Disabilities (CRPD) pre-supposes a relational model of disability.
