Deffeyes follows up Hubberts Peak (2001) and Beyond Oil (2005) to continue the argument that the world's known oil supplies have peaked and it's time to consider new directions. Drawing on research by his colleague, American geologist M. King Hubbert, Deffeyes expands on data showing a bell-shaped curve to world oil production, one that has reached its peak and is declining.

Spindletop was an enormous geyser of oil that exploded from a drilling site at Spindletop Hill, a mound located in southeastern Texas, in 1901. Reaching a height of more than 150 feet and ...

### **Spindletop - Geyser, Timeline & Discovery - HISTORY**

Peak oil is the year when the maximum rate of extraction of petroleum is reached, after which it is expected to enter terminal decline. As of 2020, peak oil forecasts range from 2019 to the 2040s, depending on economics and how governments respond to global warming. It is often confused with oil depletion; however, whereas depletion refers to a period of falling reserves and supply, peak oil ...

### **Peak oil - Wikipedia**

Before I talk about why oil is on the way out, let me first illustrate what we use it for: The chart above shows that 45% of oil is used for gasoline. And much of the rest becomes diesel fuel (25%) or heating oil (2%). That means more than 70% of every barrel that gets pulled from the ground is used to power our cars and trucks and heat our houses.

### **Oil Is Dead - Banyan Hill Publishing**

If we're looking for sectors with big potential payoffs via future growth, oil as a burnable fuel probably isn't on the list. That's not to say the oil patch has no prospects. Smart industrial policy starts with existing resources and skills, which exist there in abundance, and tries to nurture new fields of promise.

### **Is Canada's oil sector an appropriate target for ...**

Oil This update illustrates how electric vehicle adoption is becoming an increasing threat to oil demand, with demand peaking before 2030 a plausible, if not our core, scenario. The peak in our model is shallow, and the world is likely to be using oil for many decades. However, a dwindling market may increase volatility

### **Batteries Update: Oil Demand Could Peak by 2030**

U.S. oil production peaked in March 2020 at more than 13 million barrels per day. From that point, oil production fell more than 2.6 million barrels per day in four months. That's the most precipitous fall in oil production in U.S. history.
